“The Greater Richmond Region is an engaging and vibrant community enriched by the Age Wave Initiative. The Age Wave Coalition brings together a collective community—academia, business, government, non-profit and many intergenerational connections—to celebrate aging as a lifelong opportunity. We are excited RVA is a leader for Age Wave collaborations and partnerships that support older adults, individuals with disabilities, caregivers, families and residents of all ages.”

– Executive Director, Senior Connections, The Capital Area Agency on Aging

Ms. Doris Hairston, Volunteer Mentor, Foster Grandparent Program sponsored by Senior Connections, The Capital Area Agency on Aging, celebrates Greater Richmond Region’s prestigious recognition of MetLife Foundation/Generations United as one of the best intergenerational communities of 2015 in Washington, D.C.

Greater Richmond Age Wave

Aging is a natural process marked by time. It affects us as individuals as we gain wisdom, life experiences and social connections. Age also affects our communities, bringing valuable expertise and social capital that can only be provided through elderhood. Individual and community aging impacts infrastructure, government, and systems of care demanding new paradigms and models that value the assets not only of our older residents, but the strengths of all members, as we age across the lifespan.

The Greater Richmond Age Wave is a collaboration of public and private organizations, businesses, and individuals including older adults working to prepare for the opportunities and challenges of our region’s growing aging population. Together, we are working hard to implement, monitor, and evaluate the Greater Richmond Regional Plan for Age Wave Readiness—a shared blueprint that prioritizes targeted actions to improve our well-being in the counties of Charles City, Chesterfield, Goochland, Hanover, Henrico, New Kent and Powhatan, and the City of Richmond.

We want to make Richmond a better place to age, and we can do this by partnering, sharing ideas, aligning networks and learning how other communities across the Commonwealth and U.S. are engaging residents and supporting older adults.

This document is our Strategic Update on progress and learnings from key stakeholders and the two managing partners in this long-term work: Senior Connection, The Capital Area Agency on Aging, and Virginia Commonwealth University’s Department of Gerontology (Gerontology).

Our planning effort is led by the Age Wave Leadership Committee, supported by four project-based Work Groups, of over 80 collaborating organizations, and staffed through a joint venture of Senior Connections and Gerontology.

It is our hope that you read this report and use the findings to inform your agencies, collaborate with others and/or engage with us—as an individual/organization interested in volunteering.
Our Call to Action

Today, we are celebrating longevity never before seen in history. Life expectancy across the U.S. is at a record high of 79 years of age. Over the next 15 years, the number of people age 65 and older living across the Greater Richmond region will outnumber the school-age population for the first time in history. By 2040, the number of people age 85 and older will more than quadruple since 2000. This means we are living longer than ever before, and more adults are reporting good health and improvements in physical functioning (e.g., the ability to walk a mile or climb stairs) later in life. Individuals age 65 can expect to live an average of 19 more years.

Determinants of our quality of life are based on key factors that our region must embrace: design and infrastructure of our homes and neighborhoods; access to services and local supports; and networks of health care and social engagement. Collectively, we can create change by strategically considering present trends, challenges ahead, and by investing in our community.

Here is our regional opportunity.
• To discover what it means to grow older together.
• To build relationships between generations for enhancing connectivity.
• To forge new partnerships within the community.
• To advance economic workforce development, businesses, and tourism for a rapidly growing market.
• To lead the way in practice and public policy.

Projected Growth in Older Adult Population in Greater Richmond Region

Includes counties of Charles City, Chesterfield, Goochland, Hanover, Henrico, New Kent, Powhatan and the City of Richmond

Source: U.S. Census 2000, 2010; University of Virginia, Weldon Cooper Center for Public Service, Demographics and Workforce Group Population Projections
Now is our time to plan and develop communities for people of all ages and abilities.

To meet this charge requires skills, knowledge, data, and passion. The mission of the Greater Richmond Age Wave is to foster meaningful dialogue, build deeper community commitment and engage broader stakeholders in our planning efforts by assembling a corps of devoted people who are committed to collaborating and discovering new solutions to shape our region into one that is Engaged, Livable, Stable, and Well across the lifespan.

We’ve targeted five strategies to get there.

**Start Local**  Local governments and their leaders are catalysts for change. Advancing the conversation about aging at the local level is helping us to identify unique needs and opportunities that inspire new models of service delivery and capturing local data.

**Align and Integrate**  Lessons learned from national efforts and successes across the Commonwealth provide us with guidance and synergies that continue to inform our next steps and collective progress.

**Build Momentum**  Four project-based work groups use data, best practices, local to national resources, and mapping to chart the course for regional impact. The Business for Life/Aging 2.0, GeroTrifecta, Scorecard, and Toolkit work groups are engaging all sectors.

**Educate and Advocate**  Advocates are working to eliminate negative perceptions and stereotypes of aging. Recruiting more individuals to spread key messages across the age spectrum means teaching new ways of thinking. Two innovative examples are: Operationalizing Age Wave Readiness ALHP 591, a new course offered in VCU Department of Gerontology and Elders Are Our Superheroes program, a lesson plan for grades K–5, developed and taught by an art teacher in the City of Richmond.

**Work Together**  Development of meaningful and collaborative community partnerships is advancing our message and practices to thousands of people and encouraging healthy, active aging. Our CATCH Healthy Habits, national evidence-based, intergenerational wellness program is one example.

“I’ve been active all my life,” says Jane; age 71, a Richmond resident for almost 50 years. “I played basketball, tennis, and golf and I’ve recently gotten into running.” After finding out that she had high cholesterol, Jane made a commitment to intensify and expand her exercise routine. “I’d always enjoyed the running component of tennis, so I decided to register for a 10k,” says Jane. She realizes that place and time aren’t as important as the actual accomplishment. “You don’t have to be first in these things,” says Jane, “You can even be last.” When asked if she has any advice for getting into exercise later in life, Jane says: “You’re not competing with anyone, just enjoy it!”

We are proud to share this first Strategic Update on implementation of the Greater Richmond Age Wave to evaluate our regional impact, showcase key achievements, and engage additional stakeholders in becoming a part of our collaborative effort. This Plan and subsequent update belongs to us all. As you read, consider how the Age Wave relates to you, your family, your neighborhood, or business. Please write down your thoughts throughout the report (we have given you space and license to do so). When you have finished reading, ask yourself: What can I do to enhance opportunities and/or prepare for the challenges of our Age Wave?

Tell us your thoughts and comments by visiting our website: www.agewellva.com

Then, start making change by taking one or more of these steps:

✔ Continue to learn more about our region, localities, best practices, and how you can inspire leaders and policy makers by visiting www.agewellva.com

✔ Volunteer your time by contacting Senior Connections, HandsOn Greater Richmond or United Way of Greater Richmond & Petersburg

✔ Give resources to an organization that serves older adults.

✔ Engage elders in your community.

✔ Plan for your engaged elderhood.

✔ Create an Age Wave forum within your workplace, neighborhood, faith community, or school to exchange ideas and start a dialogue. We can provide tools to help kick start your conversation by contacting us at info@agewellva.com.

✔ Visit us on social media at our Pinterest page (www.pinterest.com/agewaverva), Facebook page (www.facebook.com/RVAActiveAgingWeek) and Active RVA blog (www.activerva.org/blog).

✔ Offer your personal support to a family caregiver: fix a meal, run an errand, or help with yard work.

✔ Communicate with your local government officials about reducing barriers to safety or mobility in your neighborhood.

✔ Consider a neighborhood canvassing project through the GeroTrifecta.

✔ Advance your knowledge by participating on a live webinar or archived topics ranging from person-centered care to resources for aging in place at http://alzpossible.org/

This is your opportunity to engage, lend a voice, lend a hand, take a risk and make a real difference. As life expectancy approaches a century, together we will continue to explore a new kind of frontier. Let’s make discoveries together. Let’s make changes together. Let’s pledge to a vision of creating an inclusive community for all generations—a place for aging together. How will you help make RVA the best place to age? Consider these questions: How do you Engage in your community? How Livable is your neighborhood and/or current home? How Stable is/was your employment? How Well do you manage your personal health and any chronic conditions?
Regional Impact starts locally across Greater Richmond.

Eight localities are engaged in Age Wave implementation at various levels. By adopting key components of the Plan, localities are aligning efforts and report key successes. Networks in local government are instrumental catalysts of CHANGE and moving strength-based approaches to identifying community assets and gaps in service delivery. Adopting key initiatives/partnership programs like No Wrong Door, OASIS CATCH Healthy Habits, Mobility Management, Friendship Cafés and YMCA’s Growing Younger, etc.
Regional Impact continued

Chesterfield County
- Formed a local Age Wave Coalition active for over two years and developed a draft County Plan gaining community support and input. The coalition works with the Greater Richmond Age Wave collaborative (GRAW).
- CATCH Healthy Habits completed a successful 2014 summer session at Swim RVA.
Membership: 20+ of various county departments, community leaders, Senior Connections staff and GRAW leadership members.

Charles City County
- Formed a local Age Wave Committee active for over a year with a focus on expanding quarterly events including Senior Law Day and Health and Wellness Expo.
- Local transportation program expanded in 2014.
- CATCH Healthy Habits completed successful 2014 summer session at county’s Parks and Recreation Center.
Membership: 10+ of county leaders, Richmond Regional Planning District Commission (RRPDC) staff, Senior Connections staff and GRAW leadership.

City of Richmond
- Active in GRAW planning efforts and leadership Committee since 2009.
- Richmond’s Office on Aging and Persons with Disabilities uses Plan to guide City’s programming and events.
- CATCH Healthy Habits completed successful 2014 summer and fall session at Peter Paul Development Center.
- City hosted Third Annual celebration of Richmond’s Centenarians during Active Aging Week in September, 2014.

Goochland County
- Hosted presentations on Age Wave planning among an active group of Community Partners. Group expressed interest in developing action steps and identifying strategies to move work forward.
Membership: 15+ RRPDC staff, Senior Connections staff and diverse service providers.

Hanover County
- Participates on Age Wave Leadership Committee.
- GRAW planning efforts presented to Department of Social Services staff, Council on Aging and Board of Supervisors.
- Alignment to county’s Human Service Strategic Plan in areas of transportation and health.
- Volunteer transportation has expanded through Hanover Rides.
- CATCH Healthy Habits completed successful 2014 fall session at the Patrick Henry Family YMCA.
Membership: 15+ Council on Aging of community leaders, Senior Connections staff, RRPDC staff, GRAW leadership and service providers.

Henrico County
- Participates on Age Wave Leadership Committee.
- Recently formed an Age Wave Task Force under Deputy County Managers. GRAW planning presented to Task Force in early 2015 to help move key strategies forward.
- Age Wave presented to Council on Aging.
Membership: 15+ Council on Aging of community leaders, Senior Connections staff and service providers.

New Kent County
- Hosted presentation on GRAW planning among local Resource Council to consider alignment opportunities.
- Transportation has expanded in county.
- Location for a new Friendship Café identified and expanding programs to promote health and well-being of seniors.
Membership: 20+ Resource Council members of community leaders, Senior Connections staff, RRPDC staff and service providers.

Powhatan County
- Participates on Age Wave Leadership Committee and Business for Life/Aging 2.0 work group.
- GRAW planning presented to Powhatan Chamber of Commerce with potential to move a Business initiative forward.
- A local faith coalition offers transportation through volunteer ride program.
Regional Scorecard to Track Progress

To assess successes and challenges in our communities, we measure and monitor our efforts across a regional to statewide network using The Greater Richmond Regional Plan for Age Wave Readiness as our framework. This regional dashboard identifies key indicators that define quality of life as an Engaged, Livable, Stable and Well community. These baseline measures and indicators are our initial community assessment to broad, system-wide change and/or project outcomes based on objectives established in our regional Readiness Plan.

Guiding Principles for Baseline Data
1. Free to low cost
2. Reputable source
3. Collected/updated annually and/or with regular frequency
4. Ability to track/evaluate in Planning District 15 service area
5. Exists at the lowest possible level (by county, if possible)
6. Avoid using ranking or formulaic data; it is hard to interpret
7. Committed accountable stakeholders

Disclaimer: Certain data points/indicators selected for the scorecard will not be directly influenced/changed by the coalition and/or broader community effort; however, a core objective is to select indicators/data points that our efforts can help move or influence over time.

Attributes of Scorecard
• Add Academic and health care expertise to monitor, evaluate, and track movement in our communities locally, regionally, and even statewide.
• Integrate new data sources as other Age Wave work group areas progress: Business for Life/Aging 2.0, GeroTrifecta and Toolkit; more indicators will be made available and monitored through No Wrong Door—a virtual statewide single point of entry site for accessing public and private health and human supports for older adults and adults with disabilities
• Provide sharable/useful/usable data across partners and stakeholders
• Build capacity to educate broader community and state about opportunities and regional needs (i.e. workforce shortages in elder care) and share alignment with various community partners to better meet community (and statewide) needs.
• Align direct care and social service sectors work to common shared measurements around quality of life and healthy aging.

“We find data in the Age Wave Plan valuable in the preparation of grant applications, the Case for Support for a new agency initiative, presentations to community groups, and similar purposes. We have provided copies to faith communities, businesses, and individuals for whom the Age Wave is a new concept. As an advocacy tool, it makes such a professional and well-thought-out statement about the planning process that created it and the need for wide community engagement for implementation.”

– Executive Director, Circle Center Adult Day Services
The Lifelong Learning Institute (LLI), located in Chesterfield County, is designed to meet the educational, fitness, and social enrichment needs of adults age 50 and “better.” LLI carries a cost of $150 per person for an annual membership and provides a limited number of scholarship opportunities. LLI is not limited to Chesterfield County residents.

*Recognizing that the Chesterfield Lifelong Learning Institute is one of many lifelong learning programs across the region, we use this indicator as a proxy to represent lifelong learning.

**GOAL**

People of all ages are connected through various volunteer, educational, or leisure pursuits that enhance individual quality of life and communities.

**OBJECTIVES**

1. Increase knowledge of lifelong learning and civic engagement opportunities.
2. Increase volunteerism and other forms of engagement.
3. Increase identification of support networks that engage older adults, such as neighborhood associations, faith communities, and workplaces.

**Why is this important?**

“Lifelong learning is important because it forces the mind to remain active, engaged and growing.”

#engagedcommunities

– Executive Director, Lifelong Learning Institute in Chesterfield

“I enjoy the broad range of classes offered at LLI from computers and technology, art, fitness to history and science; this is a truly unique place and the instructors know their material.”

#engagedcommunities

– LLI Member and Volunteer

**Number of Participants in Chesterfield’s Lifelong Learning Institute* by County**

The Greater Richmond Age Wave Plan, Strategic Update 2015
Population Age 65+ Participating in Senior Connections* Volunteer Programs

Senior Connections, The Capital Area Agency on Aging, provides many volunteer opportunities, including:

- Agency Outreach
- CATCH Healthy Habits
- Clerical Assistant
- Friendship Café Assistant

For a full description of all the volunteer opportunities Senior Connections offers please visit: www.seniorconnections-va.org/

Senior Connections serves the counties of Charles City, Chesterfield, Goochland, Hanover, Henrico, New Kent, Powhatan and the City of Richmond.

* Recognizing that Senior Connections is only one of many organizations across the region in which an individual can volunteer, we use this indicator as a proxy to represent volunteerism. As other Age Wave work groups progress (GeroTrifecta, Toolkit, and Business for Life/Aging 2.0), more indicators of engagement will be made available and potentially tracked via No Wrong Door and other systems of data collection.

Why is this important?
Volunteerism provides a positive impact on the economy, the community, and in the lives of individuals. #engagedcommunities

“As senior [volunteer] teams, we delight in the planning and preparation of healthy snacks for children. I interact with other senior members of my community brought together by the program.”
#engagedcommunities
– Volunteer, CATCH Healthy Habits

385 volunteers have devoted more than 100,000 hours of volunteer service equal to over $2.5 million

age 65 – 74
age 75 – 84
age 85 +

**GOAL**
Our region will offer housing, transportation, and design features that enable residents to live safely and with dignity through all the stages of their lives.

**OBJECTIVES**
1. Increase opportunities for affordable housing and home modification services for older adults.
2. Increase mobility and transportation infrastructure in order to decrease isolation of older adults and persons with disabilities.
3. Improve physical infrastructure including accessibility to housing and public transportation.
4. Promote public safety and make disaster planning widely accessible.

---

**Senior Connections Ride Connection Program**

Senior Connections, The Capital Area Agency on Aging, Mobility Management Program includes Ride Connection, transportation scheduling, and Mobility Counseling.

*Recognizing that Senior Connections Ride Connection Program is one of a few organizations that provide regional transportation to medical appointments, we use this indicator as a proxy to reflect mobility and transportation. The rider’s ability to pay is based on a sliding scale. A ride is defined as to and from the medical appointment, and is limited to 2 rides per individual per month.*

---

**Why is this important?**

94% of participants in Senior Connections Ride Connection Program believe the program helps them to improve or maintain their health. #livablecommunities

– Senior Connections Transportation Survey, 2014

---

**Graph:**

- **# OF RIDERS**
- **233 total riders**

---

*The Greater Richmond Age Wave Plan, Strategic Update 2015*
Percentage of Cost Burdened Households by County

Housing Cost Burden reflects the percent of income paid for housing by each household living in the geographic area reported. The housing cost burden is defined as more than 30% of your income going towards housing costs. This measure reflects preference, budget, and housing units available to each individual household, as well as any public or private housing assistance they receive. http://housingvirginia.org/Cost-Burden-House-Paying-30-Housing.aspx

Why is this important?

“At any age it becomes difficult to maintain your home for those who are cost burdened.” #livablecommunities

– Senior Community Housing Officer, Virginia Housing Development Authority

Means of Transportation to Work in Richmond Region

Includes counties of Charles City, Chesterfield, Goochland, Hanover, Henrico, New Kent, Powhatan and the City of Richmond

Why is this important?

“Implications that affect the future delivery of transportation services will be increased demands for public transit and paratransit.” #livablecommunities

– Principal Planner, Richmond Regional Planning District Commission

Source: Housing Virginia SOURCEBOOK, 2012

Source: U.S. Census American Community Survey 2012; Richmond Regional Planning District Commission Needs and Gaps Assessment for the Transportation Disadvantaged, 2014
GOAL
Individuals of all ages are able to obtain jobs and to access services that help to build and safeguard assets, plan for retirement, lead productive lifestyles, and care for loved ones.

OBJECTIVES
1. Encourage businesses to retain and invest in older adult workers.
2. Increase workforce entry and retention for older adults who choose to remain in the workforce.

Employment for Individuals Age 65+ in Greater Richmond Region by Industry
Includes counties of Charles City, Chesterfield, Goochland, Hanover, Henrico, New Kent, Powhatan and the City of Richmond

Why is this important?
"We can’t look at just hiring older people or younger people; one of the most important things to consider is an intergenerational approach. Some of the largest employers...think about older workers as reliable people with proven skills in customer service” #stablecommunities – President, Workforce Innovations to Navigate Global Solutions

Source: AARP Foundation, 2014 Quarter 2
Percentage of Individuals Age 65+ Living Below Federal Poverty Level (FPL) by County

Average Number of New Hires by Age in Greater Richmond Region

Why is this important?

"It's critical that business leaders start designing programs to attract and retain more mature, reliable, & skillful workers." #stablecommunities

–Senior Vice President of Product Development, Genworth Financial

30% of retired individuals responded that if they had a choice, they would not have retired. They would have continued to work if their employer had more flexible workforce policies. #stablecommunities

–Chesterfield Age Wave Input Session Survey, 2014
GOAL
Our region has effective and sustainable health and wellness resources that are coordinated, accessible, and well utilized.

OBJECTIVES
1. Increase the number of older adults participating in prevention, wellness, and chronic disease management.
2. Increase access to and coordination of health care and adult supportive services.
3. Increase awareness of the critical role of caregiving and training that supports families and skilled health professionals.
4. Increase awareness of long-term care resources.

Why is this important?
“[Residents] outside of the city have more difficulty securing consistent medical attention, socialization and transportation which is what PACE is all about.” #wellcommunities —Marketing Director, Riverside PACE (Programs of All-Inclusive Care for the Elderly)

Source: County Health Rankings, 2012-2014
* Data not available for Charles City County and Powhatan County due to small sample size
** Ages range from 18-64

Population Age 65+ in Greater Richmond Region by County

Why is this important?
Nationally 14.1 percent of the U.S. population is age 65 and over; as our population ages over the next several decades, we will become more racially and ethnically diverse. #wellcommunities

Source: U.S. Census 2000, 2010; Richmond Regional Planning District Commission, Needs and Gaps Assessment for the Transportation Disadvantaged, 2014

The Greater Richmond Age Wave Plan, Strategic Update 2015
Projected Percentage of Total Population Age 85+ by County

Why is this important?
“Knowing who we will serve [in the future] is essential to offering the most relevant programming and content that we can.” #wellcommunities
– Chief Educator and Adult Programs Manager, Virginia Museum of Fine Arts (VMFA)

Percentage of Individual Deaths by Disease by County
Research indicates that diseases chosen in this graph are often directly correlated with age.

Why is this important?
“By adopting healthier lifestyles to preventative care and treatment, we can reduce the rate of many diseases and in turn enhance quality of life, potentially longevity and lower health care costs.” #wellcommunities
– Senior Policy Analyst, Joint Commission on Health Care
Four results-oriented work groups and community deliverables drive new momentum and progress through the delivery of concrete products that include:

- **Scorecard**
  A regional dashboard to measure progress

- **GeroTrifecta**
  An intergenerational neighborhood canvassing project

- **Toolkit**
  Programs for life enrichment and local supports

- **Business for Life/Aging 2.0**
  A network of innovators and providers modeling services, products, physical environment, and workforce training to new desires and demands

Partner organizations provide time, talent, and resources to support GRAW as work group members and Chairs representing: AARP, Genworth Financial, Joint Commission on Health Care, Senior Connections, The Capital Area Agency on Aging, and Virginia Commonwealth University’s Department of Gerontology.

**Scorecard**

Utilize a regional dashboard of indicators (data points) to monitor, measure, and evaluate success of the Age Wave planning in alignment with other regional efforts and statewide initiatives such as No Wrong Door.

**Progress**

A 20+ member group culled and reviewed extensive national/regional/local datasets to develop a framework for our regional dashboard. This work group continues to provide guidance on emerging datasets and indicators from other work group areas that can inform progress of our work through other regional models and planning efforts across the country.

Chaired by Dr. Michele Chesser, Senior Health Policy Analyst, Joint Commission on Health Care
Incubating innovation in our business community, means understanding our local markets and consumers. This group brings together a network of businesses, aging professionals, and local providers focused on future services and products that appeal to a growing market of consumers. This group recognizes and guides businesses that invest in older patrons and employees. The group provides a platform to foster sound business practices—inclusive of all ages, and enhance profitability by considering key factors of physical environment, access to services, customer appeal, workforce, marketing and engagement.

Progress
A 20+ member group represents diverse organizations. The group developed a checklist of best practices based on national models to enhance profits and customer loyalty. The group is creating a value proposition and pilot to educate business leaders and retail merchants associations about mindfulness and benefits of services/products for a lifetime.

Chaired by Beth Ludden, Senior Vice President Long Term Care Product Development, Genworth Financial
Educate and Advocate

Academic Infusion Across the Age Spectrum

Advocates can eliminate negative perceptions and stereotypes of aging by focusing on the strengths and assets of an intergenerational community for people of all ages and abilities.

Operationalizing Age Wave Readiness (ALHP 591) VCU’s Department of Gerontology launched a new course for Age Wave planning in the Summer of 2014, ALHP 591. This service learning course educates students about community organizing, advocacy, and implementing a collaborative regional Plan for Age Wave Readiness. The course is co-taught with an academic and community lead and features guest lecturers in GRAW’s planning efforts from housing, service delivery to transportation. Students successfully designed a neighborhood assessment tool, building on national and local best practices from the GeroTrifecta work group. The course will be offered to graduate and undergraduate students on an annual basis.

Elders Are Our Superheroes is an art program at William Fox Elementary School for students in grades K–5 that reinforces positive images of aging and helps build awareness of the Age Wave across our region among local businesses and organizations. In 2011, an art teacher in the City of Richmond teamed up with the Director of GRAW to brainstorm a curriculum and project that educates elementary children and the broader community to celebrate and respect the wisdom and talents of elders. This program spotlights Grandparents as heroes in their own right, through the eyes of the students. This collection of artwork is a rotating exhibit among local partners and businesses that anyone can request. Please let us know if you are interested in hosting this show by e-mailing us at: info@agewellva.com.

People of all generations delight to view this collection. The program is now in its third year and continues to inspire other local teachers, schools, and organizations. Access the online gallery at: www.flickr.com/photos/agewave/
2015 MetLife Foundation/Generations United Best Intergenerational Community Award

The Greater Richmond Region was named the 2015 MetLife Foundation/Generations United Best Intergenerational Community! As a Best Intergenerational Community award recipient, Richmond, VA has become part of a national network committed to strengthening and increasing intergenerational communities throughout the country. With over 40 local intergenerational programs, festivals, events, and leisure activities bringing together residents of all ages, Richmond is a community that fosters meaningful relationships and connections between older adults, parents, and children. To learn more about the award: www.gu.org/OURWORK/Programs/BestIntergenerationalCommunities.aspx

The application was spearheaded by GRAW and highlighted efforts of various community partners and regional organizations. Supporting materials and information for this application were provided by: Chesterfield County, United Way of Greater Richmond & Petersburg, Richmond Regional Planning District Commission, PALETTE, Family Lifeline, YMCA of Greater Richmond, Sports Backers, Senior Connections, VCU’s Department of Gerontology, and others. The national award ceremony was held February 2015 in Washington, D.C.

Southern Gerontological Society Annual Meeting posters and workshop, April of 2015 in Williamsburg, VA

• Poster: Age Wave Readiness An academic model for integrating classroom and community in Age Wave Planning.
• Poster: CATCH Healthy Habits An examination of a university community partnership implementing an intergenerational program for improving physical health and activity.
• Workshop: Elders are Our Superheroes An art program for elementary school students that reinforces positive images of aging and builds awareness across communities.

“...takes time, investment, commitment, and leadership to bring younger and older people together in a true partnership that engages and respects the strengths of each generation.”

– Executive Director, Generations United
“Aging is for everybody! We want to make RVA the best place to age. Connecting across our community can make this happen. We’re engaging elders and families, really everyone across the lifespan, with best practices for optimal aging for individuals and communities. We want you to be part of the conversation.”

— Chair and Associate Professor, VCU Department of Gerontology

Collaborative Community Partnerships Through Programs, Events, and Social Media

Programs
OASIS CATCH Healthy Habits program is hosted by Senior Connections in partnership with Gerontology. This intergenerational program combats childhood obesity by instilling attainable healthy eating and active living habits among children and adults. Trained adult volunteers, age 50-plus, teach children in grades K-5 how to adopt a healthy diet and become physically active through a series of hourly sessions facilitated in after-school and summer programs. Sessions are comprised of three components, a hands-on nutrition lesson, a healthy snack, and fun physical activity. This program builds on the national model of OASIS Institute, active in over 23 cities across the U.S. Richmond is the only city in the Commonwealth with this program.

Summer and fall 2014 CATCH sites included: Charles City County Parks and Recreation, Swim RVA, Peter Paul Development Center, and Patrick Henry Family YMCA. CATCH engaged more than 20 older adult volunteers and will increase that number in 2015. More than 150 local youth learned about healthy eating habits and physical activity. If you are interested in becoming a CATCH Healthy Habits volunteer or partner site, please contact us at info@agewellva.com or visit our website: www.oasisnet.org/Richmond
Events

RVA celebrated Active Aging Week September 22–27, 2014. This week is a national initiative of the International Council on Aging (ICA) encouraging persons 50 and older to actively age in their communities. 2014 marks Greater Richmond’s first region-wide celebration collaboratively managed by GRAW and included the participation of over 40 community partners hosting an array of activities, workshops, and forums to promote proactive approaches to healthy aging.

In 2015, we will continue to promote broader awareness of this week and positive images of active lifestyles that reinforce connections to local community resources. Please consider ways you can help us strengthen outreach for this week-long event. Visit us on Facebook: www.facebook.com/RVAActiveAgingWeek

Social Media

Sports Backers Active RVA announced a new partnership with GRAW to build a bank of resources for active aging across Greater Richmond. The site will feature articles from the Age Wave’s team of thoughtful partners and authors. You will find relevant events, fashion resource guides and breaking news, all from the perspective of local experts dialed into national trends as well as our local communities. Visit us at the Active RVA blog: www.activerva.org/blog/

For inspiring messages about our regional efforts and images of aging, please visit us at: www.pinterest.com/agewaverva/

To learn about our regional neighborhoods and community canvassing efforts conducted by students in VCU Department of Gerontology, please visit our blog: http://rampages.us/agewavereadiness/

“Thank you for teaching me how to eat healthy. Now I ask my dad if I can ride my bike and eat fruit.”

– Youth Participant, CATCH Healthy Habits Program, Charles City Parks and Recreation Center

The Greater Richmond Age Wave Plan, Strategic Update 2015 23
Elders are Our Superheroes

Students in our local community completed art assignments that illustrate the value of older people and grandparents in our communities by examining their talents—as superheroes. After students completed their assignments, each one was asked to explain their image and identify the super power (talent) they had chosen for their elder. The student’s thoughts were captured by their teacher and are displayed with the artwork.

*Special thanks to William Fox Elementary School*

“My grandma just has to think it...and it’s baked. She has baking superpowers.”
–4th Grader

“This is my grandma. Her superpower is sewing clothes. She can do it super fast! In one night, it's finished! Her super power name is Super Gran.”
–1st Grader

“How my grandma’s super power works is: she can find fossils anywhere. Her super name is ‘fossil woman.’”
– 2nd Grader

“This is my grandma. Her name is super painter. She is really good at painting. Whenever she holds the paintbrush... paint just shoots out!”
– 1st Grader

“She is super grandma Jane. Her super power is giving presents. Also, she can fly.”
– 2nd Grader
Although Norbert, age 72, has long enjoyed biking, tennis, and sailing, he didn’t get into running until he was 69. Still, running is only a small portion of his diverse exercise regimen. Norbert stays active with home improvement projects and the restoration of an old sailboat he purchased from a marina. In his spare time, he is a photography enthusiast. “I take photos of nature that most people don’t see,” says Norbert. Running allows him to see the landscape more clearly, since it’s often difficult to see anything while driving. Norbert’s advice to other people his age looking to get active: “Listen to your body and take breaks. It may hurt sometimes, but it will make you stronger!”
